Thermofoil
Collection

Thermofoil Collection

Durable, easy to clean, resistant to temperature and humidity changes as well as cracking, chipping, staining and warping. M and J's Thermofoil Collection is the practical choice for any room in the office or home including kitchens, pantries, bedrooms, closets, vanities, dens, entertainment centres, garages and even furniture.

M and J's Thermofoil doors and drawer fronts are available in a full range of styles from the contemporary Slab Series, traditional Raised Panel Series and the Shaker Series using a wide range of superior quality vinyl finishes in whites and other solid colours along with a wide variety of woodgrain species. M and J uses the finest premium quality 3/4" MDF available and state of the art CNC routers to ensure that all profiles and panels have a smooth and consistent finish where quality is assured through vigorous inspection at key points in the production process.

The Thermofoil Collection includes the options of Roman or Cathedral arches in the traditional Raised Panel Series, crown mouldings, fillers, finger pulls, glass doors and mullions.

To learn more about the Thermofoil Collection contact M and J customer service at 1.800.672.3193 or email sales@mjwoodcrafts.com
